

## Pulp Clamp

Pulp Clamp - There is a wide range of forklift accessories accessible to be able to make the equipment a lot more effective. A snowplow accessory can be mounted to the front part of the forklift. A scoop bucket can be useful when the task requires transferring soil, sand, snow, or gravel. A double block handler permits the individual operating the forklift to pick up 2 loads and pile them side-by-side. A lot of those accessories are considered ideal for light to medium duty work.

One of the forklift accessories, referred to as a package lift clamp, allows for the transferring and lifting of very heavy pallets. Pallet crane forks are also utilized in order to transfer and lift pallets by using an overhead crane. A drum clamp accessory is helpful for transferring heavy drums from place to place without having to use a pallet. Lift truck mounted hoppers permit materials to be transferred and dumped without having to do it manually. These hoppers when the bumper is released are self dumping.

There are also accessories obtainable that could transform the forklift into a commercial broom or mop. Such accessories are perfect for cleaning boat docks, warehouse floors and parking areas. Lift truck mounted platforms are accessible outfitted with dual entry doors and can be attached to be able to transport employees from one area to another. The mounted platform attachment is nice for reaching parts which can be difficult to access, especially when you have products or things stored in out of the way locations or really up high.

Attachments could be a very helpful piece of equipment when put in a forklift, transforming a usual lift truck right into a mobile crane unit. It is most useful when maneuvering unbalanced or difficult loads. This attachment can either be telescopic, mounted on the carriage itself, or be attached or forklift mounted.
