

Electrical Part for Forklifts

Electrical Part for Forklifts - Lift trucks can be particularly marked to be used in unsafe places. A marked lift truck indicates the design has met the lowest requirements of ANSI/UL 558 for engine powered lift trucks or ANSI/UL 583 used for electric forklifts for the type of label attached.

The use for labels meant for lift trucks may be found in National Fire Protection Association NFPA 505 - Powered Industrial trucks including: Areas of Use, Maintenance and Operation, and Type Designations. Check with your local insurance carrier and Fire Marshall for more info on the approved uses of industrial powered forklifts in your application.

If the certain lift truck satisfies the outlined standards, labels could be attached. A labeled lift truck would show the type of designation placed on the nameplate and will have a properly corresponding label put.
